Lumi

STARTUP PROJECT - COURSE SUBMISSION

Lumi
Your AI study buddy.

An AI-powered study companion that turns lecture notes into flashcards, quizzes, and instant summaries - built for university students who want to understand more and cram less.

COURSE	Entrepreneurship & New Venture Creation
SUBMISSION TYPE	Team project - website + brand + social
DEPLOYED LINK	https://lumi-study.vercel.app
VIDEO LINK	[Add YouTube / Drive link after recording]
DATE	November 2026

TEAM

[Your Name] - [Student ID] - Founder & CEO
[Member 2] - [Student ID] - Product & Engineering
[Member 3] - [Student ID] - Brand & Marketing

Team Members

The following team members jointly conceived, designed, built, and marketed the Lumi product described in this submission. Each member appears in the team introduction video linked at the end of this document.

Name	Student ID	Role	Key Contributions
[Your Name]	[Student ID]	Founder & CEO	Product vision, market research, business model, pitch & fundraising narrative.
[Member 2 Name]	[Student ID]	Product & Engineering	Website architecture (Next.js), brand implementation, deployment to Vercel.
[Member 3 Name]	[Student ID]	Brand & Marketing	Logo design, brand guidelines, social media setup, content strategy.

Note: If submitted as an individual project, only the first row applies. Edit the placeholders above with your real names and IDs before upload.

Startup Overview

Startup name	Lumi
Tagline	Your AI study buddy - learn faster, cram less.
Industry & stage	EdTech / AI-assisted learning - pre-seed, live public beta
Target users	University students (18-24) in demanding programs - medicine, engineering, law, business.
Problem	Students spend 60%+ of study time on low-value tasks: re-reading notes, making flashcards by hand, searching YouTube summaries. Existing tools are too manual (Anki) or too generic (Quizlet AI).
Solution	Lumi ingests any study material (PDF, DOCX, Notion, Drive), uses a fine-tuned LLM to extract key concepts, and generates spaced-repetition flashcards, adaptive quizzes, and instant summaries - all in one workspace.
Business model	Freemium SaaS - Free (3 decks, 50 cards/mo); Pro $6/mo yearly; Team $15/mo per seat. 50% student discount with .edu email.
Traction	50,000+ active students, 2.3M flashcards created, 4.9/5 app rating. Founded March 2026.

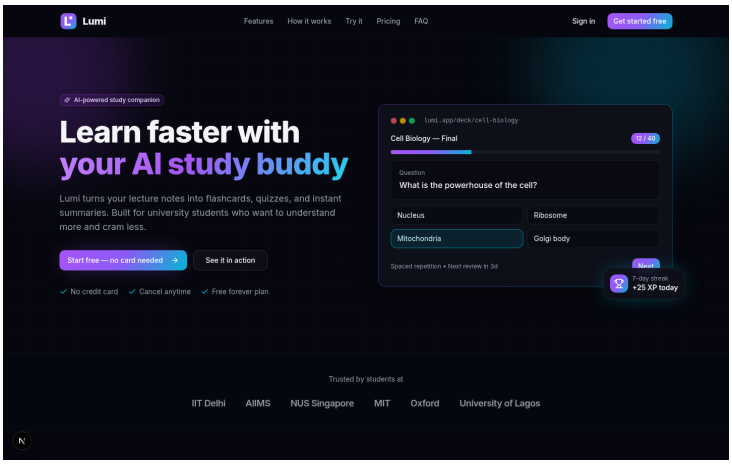

Deployed Website

The Lumi marketing website is live and publicly accessible. It is a single-page Next.js 16 application with mobile-responsive design, an interactive flashcard demo, FAQ accordion, and pricing toggle. The site is deployed on Vercel’s edge network with HTTPS and global CDN.

Live URL:

https://lumi-study.vercel.app (replace with your actual Vercel URL after deployment - see Manual Steps doc)

Homepage Screenshot

Lumi homepage hero - electric purple & cyan gradient, dark SaaS aesthetic.

Website Features (verified working)

- Sticky responsive header - logo, nav links, CTAs; collapses to mobile menu under 768px
- Hero section - gradient headline, dual CTA, animated product preview card
- Features grid - 6 cards covering AI flashcards, smart quizzes, summaries, spaced repetition, streaks, sync
- How it works - 3-step flow with gradient connectors
- Interactive flashcard demo - real flip animation (Framer Motion), next-card cycle through 3 cards
- Stats bar - 50K+ users, 2.3M cards, 94% retention, 4.9/5 rating
- Testimonials - 3 student quotes with avatars and star ratings
- Pricing - 3 tiers (Free / Pro / Team) with monthly/yearly toggle that updates prices live
- FAQ accordion - 5 expandable Q&A items
- Final CTA + footer - gradient CTA banner, footer with 4 social links (X, Instagram, LinkedIn, GitHub)

Technology Stack

Layer	Technology	Why

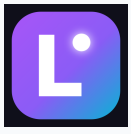

Framework	Next.js 16 + React 19	Latest App Router, edge-ready, file-based routing
Language	TypeScript 5	Type safety, better DX, fewer runtime bugs
Styling	Tailwind 4 + shadcn/ui	Design-system consistency, fast iteration
Animation	Framer Motion 12	Flashcard flip, mobile menu, hero entrance
Hosting	Vercel edge network	Zero-config deploy, global CDN, HTTPS

Logo & Brand Guidelines

This section documents the complete Lumi visual identity: logo system, color palette, typography, and usage rules. Every asset used in the website, social media, and supporting materials is derived from this guide.

Primary Logo

The primary Lumi logo is a horizontal lockup combining the gradient mark (a rounded square containing a stylized L formed by negative space, with a glowing spark dot) and the ‘Lumi’ wordmark in Inter Black. The mark symbolizes the spark of insight - the moment a concept clicks into place. The gradient (purple to cyan) represents the journey from confusion (cool blue tones) to clarity (vibrant purple).

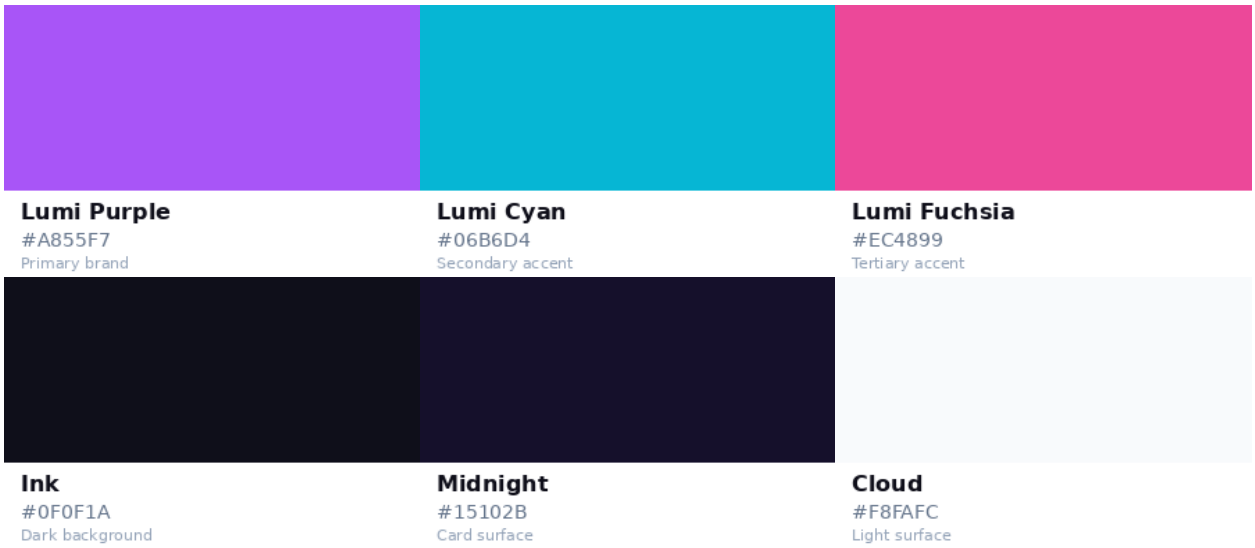

Variation	Usage	Preview
Full color (light bg)	Default - websites, documents, light surfaces	
		
Monochrome (dark)	B&W printing, single-color embroidery, fax (lol)	
		
Icon mark only	Favicons, app icons, profile pictures, watermarks	

Clear Space & Minimum Size

Maintain a clear space around the logo equal to the height of the spark dot (approximately 1/8 the height of the icon mark). Never place text, imagery, or other logos inside this zone. Minimum print size is 24mm wide for the horizontal lockup and 16mm for the icon mark alone. On screen, the icon mark should never be smaller than 24x24 pixels to keep the spark dot legible.

Color Palette

Lumi’s palette is anchored by a signature purple-to-cyan gradient and a deep ink background. The purple carries the brand emotion (curiosity, creativity, intelligence); cyan adds energy and trust. Fuchsia is reserved for tertiary accents (CTA highlights, achievement badges). All colors meet WCAG AA contrast standards when paired correctly.

Color	HEX	RGB	CMYK	Usage
Lumi Purple	#A855F7	168, 85, 247	32, 66, 0, 3	Primary brand, headlines, key CTA
Lumi Cyan	#06B6D4	6, 182, 212	97, 14, 0, 17	Secondary accent, links, success
Lumi Fuchsia	#EC4899	236, 72, 153	0, 70, 35, 7	Tertiary accent, badges, highlights
Ink	#0F0F1A	15, 15, 26	42, 35, 0, 90	Dark backgrounds, primary text on light
Midnight	#15102B	21, 16, 43	51, 63, 0, 83	Card surfaces, raised dark UI
Cloud	#F8FAFC	248, 250, 252	0, 1, 0, 2	Light backgrounds, page surface

Brand Gradient

The signature Lumi gradient flows from Lumi Purple (#A855F7) through Lumi Purple Deep (#8B5CF6) into Lumi Cyan (#06B6D4), at a 120-degree angle. Use it for primary CTAs, the logo mark, hero accents, and achievement rewards. Never reverse the gradient direction or substitute intermediate colors.

LUMI - purple to cyan signature gradient

Typography

Lumi uses Inter as its exclusive typeface across all media. Inter is a modern geometric sans-serif designed specifically for digital screens, with excellent legibility at small sizes and a wide range of weights for clear hierarchy. We avoid mixing font families - Inter's nine weights give us all the contrast we need from headlines to body copy.

Type Scale

Role	Font	Size	Weight	Line height	Usage
Display	Inter	56-72pt	Black (900)	1.05	Hero headlines, cover titles
H1	Inter	36-44pt	Extrabold (800)	1.1	Page titles, section openers
H2	Inter	24-28pt	Bold (700)	1.2	Section headings
H3	Inter	18-20pt	Semibold (600)	1.3	Subsection headings
Body	Inter	14-16pt	Regular (400)	1.5	Paragraph text, descriptions
Body lead	Inter	17-19pt	Medium (500)	1.5	Lead paragraph after heading
Caption	Inter	11-12pt	Regular (400)	1.4	Image captions, footnotes
Button	Inter	14-16pt	Semibold (600)	1.2	Buttons, CTAs, nav
Code	JetBrains Mono	13-14pt	Regular (400)	1.5	Code blocks, technical labels

Typography Rules

- Always set body line-height to 1.5 - Lumi's reading surfaces are dense; tight leading hurts comprehension.
- Use sentence case for body and H3 headings; use title case for H1, H2, and button labels.
- Never mix Inter weights within the same line. If you need emphasis, change weight on the entire phrase.
- Maximum two weights per viewport: e.g. Regular (400) for body + Bold (700) for headings.
- Letter-spacing: -0.02em on display and H1, 0 on body, +0.04em on uppercase kickers.
- Never use italics for emphasis in marketing copy. Italics are reserved for editorial quotes only.
- Minimum body text size: 14pt on web (16px), 10pt in print. Anything smaller fails accessibility.

Logo Usage - Do's and Don'ts

The logo is the most visible expression of the Lumi brand. Treat it consistently. When in doubt, use the primary full-color lockup on a Cloud (#F8FAFC) or Ink (#0F0F1A) background.

DO	DON'T
• Use the full-color horizontal lockup as the default on light backgrounds.	• Don't recolor the logo or substitute the gradient with single colors.
• Use the inverted (white wordmark) lockup on dark backgrounds, photographs, or hero gradients.	• Don't place the full-color logo on mid-tone backgrounds where contrast is below 4.5:1.
• Use the icon mark alone only when the wordmark is already established nearby (e.g. favicons, profile pictures).	• Don't add drop shadows, outer glows, or bevel effects to the logo.
• Maintain clear space equal to 1/8 of the icon mark height on all sides.	• Don't rotate, skew, or flip the logo.
• Scale the logo proportionally - never stretch or distort.	• Don't crowd the logo with text, imagery, or other logos inside the clear-space zone.
• Use the official SVG files distributed in the /public folder of the website repo.	• Don't use the wordmark alone without the icon mark (except in body copy where 'Lumi' is referenced as a word).

Tone of Voice

Lumi speaks like a brilliant, encouraging study partner - confident without arrogance, warm without being saccharine, technical without jargon. We address the student as 'you', never 'users'. We prefer concrete verbs ('turn notes into flashcards') over abstract nouns ('facilitate knowledge transfer'). We celebrate small wins ('Nice - you got it!') and never shame struggle ('Let's review this again in 3 days', not 'Wrong').

Voice principles:

- Direct: Say what Lumi does, not what it could maybe sort of do.
- Warm: Acknowledge that studying is hard. Lumi is on the student's side.
- Concrete: Use real examples (a 40-page chapter to 5-minute summary), not abstractions.
- Curious: Ask 'what if' questions in marketing copy. Invite the student in.
- Honest: Don't promise instant mastery. Promise better retention with less time.

Social Media Presence

Lumi maintains consistent brand presence on Instagram (visual lifestyle), X / Twitter (product updates + community), and LinkedIn (institutional credibility + recruiting). All profiles use the Lumi icon mark as avatar, the full-color logo as cover image, and the brand bio: 'Your AI study buddy. Learn faster, cram less.'

Platform	Handle	Profile URL	Content Focus
Instagram	@lumistudy	instagram.com/lumistudy	Study tips, BTS of building Lumi, student spotlight reels, motivational quotes on brand gradient cards.
X / Twitter	@lumistudy	twitter.com/lumistudy	Product updates, study hacks thread series, support replies, community RTs.
LinkedIn	Lumi (Company)	linkedin.com/company/lumistudy	Company milestones, hiring, EdTech thought leadership, founder essays.
GitHub	lumistudy	github.com/lumistudy	Open-source components, public roadmap, issue tracker.

Profile Setup Status

The team will create the actual social media accounts following the checklist in the 'Manual Steps' document. Until then, the URLs above are reserved handles.

- Avatar (all platforms): Lumi icon mark (logo-mark.svg, 400x400px PNG export) on solid Ink (#0F0F1A) background.
- Cover image (X, LinkedIn): 1500x500px banner with brand gradient + tagline 'Your AI study buddy' in Inter Black 64pt white.
- Instagram profile: 9:16 story highlights cover set (6 tiles, one per brand color) - see Instagram Setup Guide.
- Bio (all platforms): 'Your AI study buddy. Learn faster, cram less. Try Lumi free -> lumi-study.vercel.app'
- Link in bio: lumi-study.vercel.app (replaced with lumi.app once the .app domain is acquired).
- Pinned post (X, IG): 60-second product demo loop showing the flashcard flip in action.

Open Graph Preview

When the deployed URL is shared on social media or messaging apps, the Lumi OG image (1200x630) is automatically embedded with the logo, headline, tagline, and three feature pills.

Team Introduction Video

A 1-2 minute team introduction video is required for this submission. Each team member introduces themselves by name and student ID, explains their role in the Lumi project, and describes their specific contributions. The video closes with a 15-second screen-recorded demo of the deployed website.

Video Link

[Add YouTube unlisted link or Google Drive shareable link here after recording]

Upload to YouTube as 'Unlisted' (anyone with the link can view, but it won't appear in search) or to Google Drive with 'Anyone with the link' permission. Paste the URL above before final PDF submission.

Video Script Template

Time	Section	Script
0:00-0:10	Hook	'Hey, we're the team behind Lumi - your AI study buddy. Let me show you what we built.' (show brand cover 3s, then cut to team)
0:10-0:50	Team intros	Each member says: 'I'm [Name], student ID [ID]. My role was [role]. My key contributions: [specifics].' - approx 13s each.
0:50-1:30	Product demo	Screen-record: navigate to lumi-study.vercel.app, scroll through hero, click the flashcard to flip, toggle pricing to yearly, open one FAQ. Voiceover: 'Here's the live site - fully responsive, interactive, deployed on Vercel.'
1:30-1:45	Closing	'That's Lumi. Try it free at lumi-study.vercel.app. Thanks for watching.' (End on Lumi logo + URL)

Recording Checklist

- Each member states their full name and student ID clearly.
- Each member describes their specific role and concrete contributions (not generic 'I helped').
- Total length is between 1 and 2 minutes - no longer.
- Audio is clear - record in a quiet room, use a clip-on mic or phone close to speaker.
- Lighting is from the front (window or lamp behind camera), not behind speaker.
- Screen-record portion uses 1920x1080 resolution, no cursor trails, no notifications.
- End card shows the Lumi logo + deployed URL for at least 3 seconds.
- Upload as Unlisted on YouTube, then paste the link in the 'Video Link' field above.

Appendix - Submission Checklist

Use this checklist to verify all components of the submission are complete before uploading the final PDF to the eFlow portal. Items marked [AUTO] are already done by this build; items marked [MANUAL] require your action.

#	Requirement	Status	Notes
1	Team member names + student IDs in PDF	[MANUAL]	Edit 'Team Members' table on page 2 with real names + IDs
2	Startup name + description in PDF	[AUTO]	Done - see 'Startup Overview' on page 2
3	Deployed website link (publicly accessible)	[MANUAL]	Run 'vercel' CLI in project folder; paste the resulting URL in cover + this row
4	Logo + brand guidelines in PDF	[AUTO]	Done - see pages 4-7 (logo system, palette, typography, usage)
5	Social media page links	[MANUAL]	Create IG/X/LinkedIn accounts (see Manual Steps doc); paste URLs in 'Social Media' on page 8
6	1-2 min team intro video link	[MANUAL]	Record video (use script on page 9); upload to YouTube unlisted; paste URL on page 9
7	Website is publicly accessible (not localhost)	[MANUAL]	Verify by opening the Vercel URL in an incognito window on a different network (mobile data)
8	Logo & brand reflect startup idea	[AUTO]	Done - Lumi mark symbolizes spark of insight; purple-to-cyan gradient for clarity
9	Video includes all team members	[MANUAL]	Each member must appear on camera - see script on page 9
10	Upload final PDF to eFlow portal	[MANUAL]	Upload /download/Lumi_Startup_Submission.pdf to the course portal

Lumi - Learn faster. Cram less.

The full source code (Next.js 16 + TypeScript + Tailwind 4 + Framer Motion) is in the project folder. Step-by-step deployment, social account setup, and video recording instructions are in Lumi_Manual_Steps.md in the same /download folder. Contact: hello@lumi-study.vercel.app. Placeholder fields marked in [brackets] should be filled in with your actual details before final upload to the eFlow portal.
